Mr. Harold Weisberg
7627 Old Receiver Rd.
Frederick, Maryland
21702

Dear Mr. Weisberg:

Thank you for finding Oswald in New Orleans. I knew you could to it. I am enclosing a check for $26.25.

I hope you are well. The conference in Dallas was a good time. I found there to be more agreement than disagreement in where we should go from here, as well as the divergent theories.

There was one presentation that was astounding. A Mr. Tom Wilson, using a camera that can distinguish 256 different kinds of gray, showed us the face behind Oswald's in the backyard photographs, the neck wound, going in the front, transvering the neck and going out the back, inside the transectomy wound in an autopsy photograph, all the brain matter in the air around President Kennedy's head in the Zapruder film, the brain left inside President Kennedy's head after the head shot, the fragment in the air that lands in the grass on the south side of Elm St. that goes on to become the Harper fragment, the eye and hair color of "Badgeman", the eagle on the badge, the smoke puff in the Nix film, and that Gordon Arnold was just where he said he was.

Now I know all that sounds fantastic, but I was there. I got it all on audiotape. I know it was videotaped and I am working on acquiring a copy from a friend I made there. It is all visual information so an audiotape would not due it justice. It is all base on science, namely light reflection values. The specifics on parts of the presentation went over my head because I am not a scientist but it did not sound crazy.

Jack White, Dr. Wecht, Jim Marrs and other panelists stood behind Mr. Wilson and his information. He works for U.S. Steel and has used his camera to determine the various qualties of different metals in his job.

Personally, I beleive in him and his information. He is bringing his information to the government first then he said he will make his stuff available for others to study.

This could be the vital information we need to re-open the case. I beleive he proved two grassy knoll assassins and the conspiracy to frame Oswald, at least that the backyard photograph are definitely forgeries.

Now please do not think I am a buff or theorist. I deal in facts. I want to check Mr. Wilson's facts myself. I will have to find a similar or exact camera I may find one at RPI or at a GE research lab. RPI is a nationally known science college in Troy, N.Y.
It will probably cost a fortune to independently do this research but I will look into it

Lastly, be very carefull with those typos
See enclosed

Sincerly Yours

Joseph Backes
